

Blanchard River Watershed Study 100 Year Flood Plain

100 Year Storm Event

The light blue shading on the map below indicates the areas that are at risk of flooding during a 100 year storm event with rain falling evenly across the Blanchard River Watershed.

100 Year Storm Event with Proposed Project

US Army Corps of Engineers
Buffalo District
BUILDING STRONG®

The 100 year flood plain is based on the results of the U.S. Army Corps of Engineers (USACE) hydrology and hydraulics model. USACE will coordinate with the Federal Emergency Management Agency (FEMA) and submit the necessary documentation for map revisions for modifications to existing flood insurance maps.
