SUBJECT: Use of teflon lubricant on tool joints during drilling operations.

SUMMARY: A teflon based lubricant was used on tool joints when drilling monitor wells MW-C-1D and MW-D-1. Conversation with a chemist of the manufacturing company yielded information that the product contains various constituents of which ~~volatile organics~~ hydrocarbons are included. Stated that this product was not to be used during any drilling operations and that the Corps prefers that no lubricants be used but vegetable oil is acceptable. Acres stated that they would use no lubricants of any type on all future drilling.
