Lt. Marks	USA Technical Escort Unit	301-671-4381

SUBJECT

Trenching during Remedial Investigation at Former Lake Ontario Ordnance Works.

SUMMARY

I contacted Lt. Marks to inform him that we intend to conduct trenching operations during the week of 18 July 88. There is a slight chance that we might encounter gas cylinders of phosgene gas, or other substances. If so we would want the Escort Unit to remove the cylinders for us. Lt. Marks indicated we should contact him if gas cylinders are encountered. He will then notify his higher headquarters (AMC com) for authority to remove the cylinders. The Escort unit has the capability of having a 15 person response team in the air within 4 hours, for urgent situations. For normal situations they would respond within 24 hours. The escort unit has a 24-hour per day manned telephone line for emergencies. This hot-line number is 301-671-2773.
