Ken Liffin	ACRES	

SUBJECT: L Ontario Ordnance

ROUTING	
NAME/SYMBOL	INT

SUMMARY

I called to let George Marretti know that dedicated, teflon or stainless samplers could be used in lieu of rinsate blanks, provided they are precleaned. Ken Liffen received the message. He said they had about 60' of trench opened and couldn't find TNT line in area "L". They are collecting a sample & backfilling. They may finish sampling on Wednesday & since the equipment is rented for a week they will continue investigation on other areas that were questionable.
