Location of Visit/Conference:

ROUTING	
NAME/SYMBOL	INT

NAME OF PERSON(S) CONTACTED OR IN CONTACT WITH YOU: Ken Liften

ORGANIZATION (Office, dept., bureau, etc.): ACRES

TELEPHONE NO:

SUBJECT: L. Ontario Ord

<Kathy Older on second line>

SUMMARY

The only material found in B&C areas was buried metal wire and old building foundations, which were probably the source of geophysical anomalies. They dug 75' of ~~1'~~ up to 18' deep trench trying to locate the TNT line, without success. We told them not to explore further ~~with~~ for the line. They have uncovered a large ~~stock~~ pile of drums in "A" ~~starting~~ They started about 25' from the road & quickly found the stockpile. They propose to finish original outlined work today (acid line) and would like to spend tomorrow better delineating the lateral extent of the stockpile. They propose ~~up to 4~~ additional short trenches at the perimeter with perhaps one or two deeper trenches for the vertical. They would like authorization for up to 1 or 2 additional water samples and ~~perhaps~~ 1 drum sample. Agreed that trench would not extend into road.

ACTION REQUIRED

After better definition from ACRES:
Prepare cost estimate & written order

NAME OF PERSON DOCUMENTING CONVERSATION	SIGNATURE	DATE
Jack Geneseaux		7/21/88

ACTION TAKEN 1030 — Called Ken to check on status, still waiting for sub to get to office. I found costs for contract & subs in Lee's files and started preparing cost estimate.
