SUBJECT

Field Investigations @ former L. Ontario

SUMMARY

Ken provided me with the following information regarding trenching operations during the week of 18-22 July 88:

1) Area C - Found foundation materials & coiled wire near surface. Took soil samples

2) Acid Line - couldn't locate; not even at old acid bldg.

3) Area A - drums found at 6-foot depth, in groundwater (dug 30' long trench) Many drums were crushed and leaking. An oil sheen was present. Pulled 5 drums. A soil sample was taken above the groundwater table. A water sample was taken from the trench.

4) To determine extent of drum area, Acres dug 4 additional trenches, including a 50' x 20' trench adjacent to road. No samples were taken since drums and floating product was identical in appearance to the materials found in the initial trench.

5) Drawings were used to locate the waste pipes, but they still could not be located

6) A video of the trenching operations was made by Acres. It was narrated by Acres staff.
