Corps to Hold Luckey FUSRAP Site Information Session

LUCKEY, OH— The U.S. Army Corps of Engineers, Buffalo District, (Corps) will hold an information session regarding the Luckey Formerly Utilized Sites Remedial Action Program (FUSRAP) Site on **Tuesday, July 27, 2010, from 6 p.m. to 8 p.m., at American Legion Post 240, located at 335 Park Drive, Luckey, Ohio, 43443.** The Corps' project team will present information about work currently being performed at the site, and will also be available to answer questions.

The Corps completed additional field and laboratory investigations at the Luckey Site, located at 21200 Luckey Road in Luckey, Ohio, using funds received through the American Recovery and Reinvestment Act of 2009. "Stimulus funding allowed the Corps the opportunity to obtain data required to proceed with the cleanup of the site," said Duane Lenhardt, Luckey Site project manager. Remediation of the Luckey Site is scheduled to begin in 2014.

Annual groundwater monitoring will be conducted in late July to verify that impacted groundwater is not migrating offsite. Groundwater sampling will continue on an annual basis until remediation of the site begins, at which time monitoring will become more frequent.

More information about the Luckey Site may be found at www.lrb.usace.army.mil/fusrap/ or by contacting the Corps at 1-800-833-6390 (option 4).
