Location NFSS Date 10/31/13

Project / Client NFSS - BOP Field Investigation 2013

rain, ~65°

0845 [redacted] arrives onsite with GPS and remainder of rad instruments [redacted] performing initial rad instrument set up, Shawn Conway onsite

0900 spoke with [redacted] regarding plan to start sampling at fenceline once drillers arrive onsite

1330 prepare instrument for background gamma survey.

1400 [redacted] begin background gamma survey along grass and asphalt entrance driveway to facility

1530 [redacted] download data from background survey

1630 Depart site

[redacted]

Location NFSS Date 11/1/13

Project / Client NFSS - BOP Field Investigation 2013

cloudy, 55°, high winds

0800 [redacted] arrives at site [redacted] onsite

0815 safety meeting [redacted] calibrate instrument

0930 [redacted] begin background gamma survey

1100 complete background gamma survey along entrance road

1130 [redacted] enters data into system

1200 [redacted] spoke with [redacted] to confirm geophysical survey for Wednesday 11/6/13

1330 perform gamma survey along fence across MacArthur St.

1530 complete survey [redacted] to input data

1630 depart site

[redacted]

Location NFSS Date 11/4/13

Project / Client NFSS - BOP Field Investigation 2013

Cloudy, 40°

0730 [redacted] onsite

S. Conway onsite

Frost on ground, [redacted] and P[redacted] calibrate instruments

1000 head out to fence line to obtain data missing from Fridays walkover. Adjusted meter from 1' to 4" off ground per USACE request

1030 fence down and area cleared. Appears location 528 #3 would be located just the cleared area. Consult with [redacted] and per [redacted] location moved to the edge of property in cleared area, marked with paint

1100 [redacted] USACE attempting to locate soil boring location. Poor satellite reception, will try later this afternoon.

1220 Test America arrives at site with coolers and sample bottles. Delivered nine coolers and 16oz plastic sample bottles. Per conversation with [redacted], 16oz plastic is acceptable to use. Test America to deliver 4oz amber glass, 1 liter poly and Ziploc DI water to site tomorrow

1500 [redacted] complete gamma survey

Location NFSS Date 11/4/13

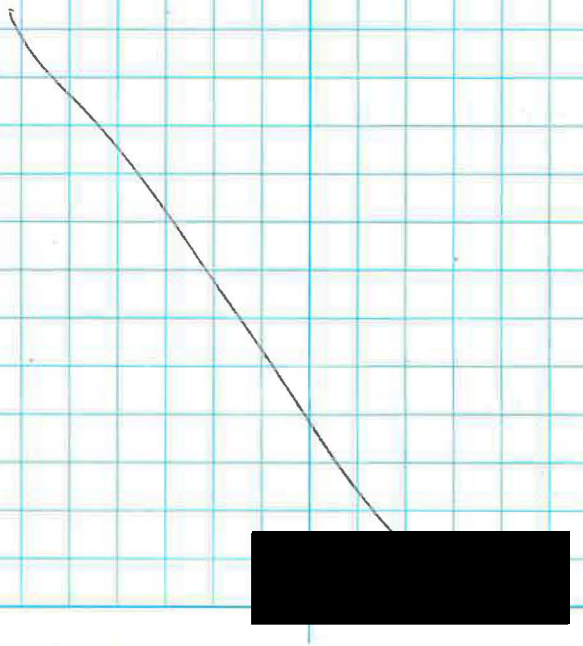
Project / Client NFSS - BOP Field Investigation

at fence area with meter 4" above ground

1540 Scan coolers from Test America

1600 [redacted] input data from walkover near fence line along MacArthur road. Found five locations with elevated gamma readings (19000 - 42190 cpm) flagged areas in field.

1700 depart site



Location NFSS Date 11/5/13

Project / Client NFSS - BOP Field Investigation 2013

41°, partly cloudy

0700 [redacted]
arrive onsite.
[redacted] arrive onsite - [redacted]
0730 [redacted] onsite
[redacted] holds safety meeting
0746 A. [redacted] perform source checks on rad equipment
0815 [redacted] and [redacted] head to MacArthur road to verify boring locations with GPS
0830 [redacted] arrive onsite
0900 [redacted] survey drillers equipment
0930 [redacted] began gamma survey of EU 11, MH06 area
1010 Test America onsite to deliver remainder of sample jars, DI water, three coolers. Missing 1-liter amber glass jars. [redacted] contact [redacted] regarding missing jars.
1200 Russo set up geoprobe at sample location.
Load up vehicles with supplies
[redacted] arrive onsite
