

Niagara Falls Storage Site News from the Corps

Sent: Wed 10/23/2013 4:50 PM

Hello from the U.S. Army Corps of Engineers Buffalo District:

The Field Sampling and Analysis Plan for the Niagara Falls Storage Site Balance of Plant Operable Unit "Investigation to Refine the Extent of Soil Contamination" is now available at

<http://www.lrb.usace.army.mil/Missions/HTRW/FUSRAP/NiagaraFallsStorageSite.aspx>
in the "Reports" section of the webpage.

The primary objectives of this field investigation are to:

- Delineate soil contamination in the Balance of Plant Operable Unit;
- Expose and evaluate the former Lake Ontario Ordnance Works sanitary sewer in the vicinity of groundwater monitoring well OW11B; and,
- Perform a geophysical survey in the area south of the Interim Waste Containment Structure.

The Buffalo District welcomes your input in regard to these plans. Please provide your comments to fusrap@usace.army.mil by November 4, 2013.
