Dear Sirs:

**CERTIFICATION OF THE REMEDIAL ACTION PERFORMED AT THE NIAGARA FALLS STORAGE
SITE VICINITY PROPERTIES FROM 1983 THROUGH 1986**

The Department of Energy (DOE) has completed radiological surveys and taken remedial actions to decontaminate the properties in the vicinity of the DOE-owned Niagara Falls Storage Site (NFSS) in Lewiston, New York. These vicinity properties had been contaminated by radioactive materials that had originally been stored at NFSS.

The final step in this decontamination effort is to certify that these properties are in compliance with applicable decontamination criteria and standards. This certification of compliance provides assurance that future use of the property will result in no radiological exposure above DOE criteria and standards established to protect members of the general public or site occupants. Enclosed you will find a certification statement for your property.

When completed, a formal certification docket will be placed in the Lewiston library. This docket will summarize all actions taken to bring the NFSS vicinity properties into compliance with DOE criteria and standards, and will provide references to all pertinent documents.

If you have any questions, please contact Mr. Ronald Kirk at (615) 576-7477.

Sincerely,

Lester K. Price, Director

The U.S. Department of Energy, Oak Ridge Operations Office, Former Sites Restoration Division, has reviewed and analyzed the radiological data obtained following remedial action at Niagara Falls Storage Site vicinity properties that were contaminated by material similar to that stored at the former Lake Ontario Ordnance Works in Lewiston, New York. Based on this analysis of all data collected, the Department of Energy (DOE) certifies that the following properties are in compliance with DOE decontamination criteria and standards.

Property owned by Angelo F. and Joseph S. Laduca, including:

Areas located near the junction of Highway 31 and Military Road, referred to as Anomaly BB, as described in the deed, liber 2175, page 100.

This certification of compliance provides assurance that future use of the property will result in no radiological exposure above applicable guidelines established to protect members of the general public or site occupants.
