Mr. John Sims
Somerset Group, Inc.
Lew-Port Industrial Park
Balmer Road
Youngstown, New York 14174

Dear Mr. Sims:

CERTIFICATION OF THE REMEDIAL ACTION PERFORMED AT THE NIAGARA FALLS STORAGE SITE VICINITY PROPERTIES FROM 1983 THROUGH 1986

The Department of Energy (DOE) has completed radiological surveys and taken remedial actions to decontaminate the properties in the vicinity of the DOE-owned Niagara Falls Storage Site (NFSS) in Lewiston, New York. These vicinity properties had been contaminated by radioactive materials that had originally been stored at NFSS.

The final step in this decontamination effort is to certify that these properties are in compliance with applicable decontamination criteria and standards. This certification of compliance provides assurance that future use of the property will result in no radiological exposure above DOE criteria and standards established to protect members of the general public or site occupants. Enclosed you will find a certification statement for the properties owned by the Somerset Group, Inc.

When completed, a formal certification docket will be placed in the Lewiston library. This docket will summarize all actions taken to bring the NFSS vicinity properties into compliance with DOE criteria and standards, and will provide references to all pertinent documents.

If you have any questions, please contact Mr. Ronald Kirk at (615) 576-7477.

Sincerely,

Lester K. Price, Director
Former Sites Restoration Division

STATEMENT OF CERTIFICATION: NIAGARA FALLS STORAGE SITE
VICINITY PROPERTIES ASSOCIATED WITH THE
FORMER MED/AEC OPERATIONS

The U.S. Department of Energy, Oak Ridge Operations Office, Former Sites Restoration Division, has reviewed and analyzed the radiological data obtained following remedial action at Niagara Falls Storage Site vicinity properties that were contaminated by material similar to that stored at the former Lake Ontario Ordnance Works in Lewiston, New York. Based on this analysis of all data collected, the Department of Energy (DOE) certifies that the following property is in compliance with DOE decontamination criteria and standards.

Properties owned by Somerset Group, Inc., including:

A portion of Property A as described in the deed, liber 1503, page 752.

A portion of Property D as described in the deed, liber 1503, page 752.

A portion of Property T as described in the deed, liber 1503, page 752.

A portion of Property U as described in the deed, liber 1503, page 752.

A portion of Property V as described in the deed, liber 1503, page 752.

A portion of Lot 13 along the Central Drainage Ditch as described in the deed, liber 1503, page 752.

This certification of compliance provides assurance that future use of these properties will result in no radiological exposure above applicable guidelines established to protect members of the general public or site occupants.

Gentlemen,

Recently I received indirect notice that property owned by me, described in your report of February 26, 1992, has been certified as decontaminated.

RE: Areas located near the junction of Highway 31 and Military Road, referred to Anomaly BB, as described in the deed, liber 2175, page 100.

Please amend your records for future notices to show my address as 151 Fernwood Lane, Grand Island, New York 14072.

Thank you!

Sincerely yours,

Angelo F. LaDuca

Dear Sirs:

CERTIFICATION OF THE REMEDIAL ACTION PERFORMED AT THE NIAGARA FALLS STORAGE SITE VICINITY PROPERTIES FROM 1983 THROUGH 1986

The Department of Energy (DOE) has completed radiological surveys and taken remedial actions to decontaminate the properties in the vicinity of the DOE-owned Niagara Falls Storage Site (NFSS) in Lewiston, New York. These vicinity properties had been contaminated by radioactive materials that had originally been stored at NFSS.

The final step in this decontamination effort is to certify that these properties are in compliance with applicable decontamination criteria and standards. This certification of compliance provides assurance that future use of the property will result in no radiological exposure above DOE criteria and standards established to protect members of the general public or site occupants. Enclosed you will find a certification statement for your property.

When completed, a formal certification docket will be placed in the Lewiston library. This docket will summarize all actions taken to bring the NFSS vicinity properties into compliance with DOE criteria and standards, and will provide references to all pertinent documents.

If you have any questions, please contact Mr. Ronald Kirk at (615) 576-7477.

Sincerely,

Lester K. Price, Director
Former Sites Restoration Division

STATEMENT OF CERTIFICATION: NIAGARA FALLS STORAGE SITE
VICINITY PROPERTY ASSOCIATED WITH THE
FORMER MED/AEC OPERATIONS

The U.S. Department of Energy, Oak Ridge Operations Office, Former Sites Restoration Division, has reviewed and analyzed the radiological data obtained following remedial action at Niagara Falls Storage Site vicinity properties that were contaminated by material similar to that stored at the former Lake Ontario Ordnance Works in Lewiston, New York. Based on this analysis of all data collected, the Department of Energy (DOE) certifies that the following property is in compliance with DOE decontamination criteria and standards.

Property located along the Central Drainage Ditch owned by Niagara Falls County (no deed reference).

This certification of compliance provides assurance that future use of the property will result in no radiological exposure above applicable guidelines established to protect members of the general public or site occupants.

Mr. George H. Spira
Vice President and General Manager
CWM Chemical Services, Inc.
P.O. Box 200
1550 Balmer Road
Model City, New York 14107

Dear Mr. Spira:

CERTIFICATION OF THE REMEDIAL ACTION PERFORMED AT THE NIAGARA FALLS STORAGE SITE VICINITY PROPERTIES FROM 1983 THROUGH 1986

The Department of Energy (DOE) has completed radiological surveys and taken remedial actions to decontaminate the properties in the vicinity of the DOE-owned Niagara Falls Storage Site (NFSS) in Lewiston, New York. These vicinity properties had been contaminated by radioactive materials that had originally been stored at NFSS.

The final step in this decontamination effort is to certify that these properties are in compliance with applicable decontamination criteria and standards. This certification of compliance provides assurance that future use of the property will result in no radiological exposure above DOE criteria and standards established to protect members of the general public or site occupants. Enclosed you will find a certification statement for the properties owned by CWM Chemical Services, Inc., with the exception of properties E, E', and G.

During the certification of the CWM properties, it was determined that these three properties could not be released based on available information. Property use at the time of characterization and remediation activities prevented access to several small areas that included (1) soil beneath Lagoon 6 and the berm surrounding that lagoon on Property E, (2) soil beneath a roadway and PCB storage tanks on Property E', and (3) soil beneath the liquid treatment pond on the western edge of Property G. In a letter dated March 6, 1989, it was stated that radiological post-remedial action surveys verified that remedial action had been satisfactorily completed for properties E' and G. This meant that the areas that were remediated at that time met guidelines, but it did not mean that the entire property was verified for release.

Each of the non-released areas either has the potential for residual contamination, based on historical data, or is known to contain contamination that may exceed DOE guidelines for release. It is therefore not possible to state categorically that contamination does not exist in those areas. If these areas become accessible for surveying and upon written notification by CWM that the areas are accessible, DOE will survey the areas to determine their status.

When completed, a formal certification docket will be placed in the Lewiston library. This docket will summarize all actions taken to bring the NFSS vicinity properties into compliance with DOE criteria and standards, and will provide references to all pertinent documents.

If you have any questions, please contact Mr. Ronald Kirk at (615) 576-7477.

Sincerely,

Lester K. Price, Director
Former Sites Restoration Division

Mr. Robert Cleary, Jr.
Vice President, Regional Operations
Niagara Mohawk Power Corporation
535 Washington Street
Buffalo, New York 14203

Dear Mr. Cleary:

CERTIFICATION OF THE REMEDIAL ACTION PERFORMED AT THE NIAGARA FALLS STORAGE SITE VICINITY PROPERTIES FROM 1983 THROUGH 1986

The Department of Energy (DOE) has completed radiological surveys and taken remedial actions to decontaminate the properties in the vicinity of the DOE-owned Niagara Falls Storage Site (NFSS) in Lewiston, New York. These vicinity properties had been contaminated by radioactive materials that had originally been stored at NFSS.

The final step in this decontamination effort is to certify that these properties are in compliance with applicable decontamination criteria and standards. This certification of compliance provides assurance that future use of the property will result in no radiological exposure above DOE criteria and standards established to protect members of the general public or site occupants. Enclosed you will find a certification statement for the properties owned by the Niagara Mohawk Power Corporation.

When completed, a formal certification docket will be placed in the Lewiston library. This docket will summarize all actions taken to bring the NFSS vicinity properties into compliance with DOE criteria and standards, and will provide references to all pertinent documents.

If you have any questions, please contact Mr. Ronald Kirk at (615) 576-7477.

Sincerely,

Lester K. Price, Director
Former Sites Restoration Division

STATEMENT OF CERTIFICATION: NIAGARA FALLS STORAGE SITE
VICINITY PROPERTY ASSOCIATED WITH THE
FORMER MED/AEC OPERATIONS

The U.S. Department of Energy, Oak Ridge Operations Office, Former Sites Restoration Division, has reviewed and analyzed the radiological data obtained following remedial action at Niagara Falls Storage Site vicinity properties that were contaminated by material similar to that stored at the former Lake Ontario Ordnance Works in Lewiston, New York. Based on this analysis of all data collected, the Department of Energy (DOE) certifies that the following property is in compliance with DOE decontamination criteria and standards.

Property owned by Niagara Mohawk Power Corporation, including:

Property R, no deed reference.

This certification of compliance provides assurance that future use of the property will result in no radiological exposure above applicable guidelines established to protect members of the general public or site occupants.
