Dear [REDACTED]

I have received your letter asking for input on the establishment of a Restoration Advisory Board for the projects at the former Lake Ontario Ordnance Works.

I strongly object to the request, because there is a current Restoration Advisory Board with strong and informed citizen input that I consider to be doing a fine job. I think this present RAB needs to be honored and continued. It should not be replaced with a new Board.

Please acknowledge and support the current RAB and do not make attempts to form one to replace it.

Sincerely,

[REDACTED]
