Dear [REDACTED],

CWM Chemical Services is committed to fostering a healthy relationship with our community. In the past year we were visited by hundreds of our neighbors at our Open House. We distributed newsletters with information on such topics as the new cover re-design for the landfill, hosted information sessions on topics such as monitoring on the site and met and presented to community groups.

In an effort to broaden communication with community stakeholders we are proposing a Community Information Exchange that would bring together people from various government agencies, elected officials, community associations and interested residents. This group will meet on a quarterly basis to discuss matters of interest to the community regarding CWM's activities.

To assure a constructive dialogue with all members of the community, we believe that Community Exchange Meetings should be facilitated by a professional mediator who could seek input and feedback from the members and set an agenda that reflects their priorities. Meetings will be open to the public.

Individuals being approached to be part of the Community Information Exchange are from: The Niagara County Legislature, The New York State Department of Environmental Conservation, The US Environmental Protection Agency, Elected Officials from the Towns of Porter, Lewiston, Niagara, Wheatfield, Wilson, Villages of Youngstown and Lewiston, the City of Niagara Falls, The Niagara County Health Department, The Army Corps of Engineers, The Lewiston-Porter Board of Education, The Niagara River Anglers Association, The Niagara County Federation of Conservation Clubs, Residents for Responsible Government, CWM Chemical Services and interested residents from the community.

We have already heard from individuals in the community who have shown a willingness to be a part of this group. We hope that you will consider participating.

Please respond to your willingness to be a part of this group by contacting me directly at [REDACTED] or via e-mail at [REDACTED]
