Hello Arleen,

Thank you for the USACE responses to the concerns detailed in my July 29, 2010 letter over IWCS integrity and NFSS contamination. I will review the information. In the meantime, I would like to request that USACE post the remaining two IWCS performance monitoring reports for 1991 and 1992 on the USACE NFSS web site as soon as possible, so that RAB members and the public are given an opportunity to review this key information.

Ann Roberts

Arleen,

Thank you. Would you please ask Michelle Barker or John Busse, whether any investigation of the 10" water intake line and associated water lines is planned? The RI identified the 10" water intake line as being a possible preferential pathway for radioactive contamination to migrate from south of the IWCS, but there does not appear to have been any follow up to delineate the extent and nature of the contamination which may be present in and around

the water lines

Regards,

Ann Roberts.

Arleen,

Please find attached my response to the USACE letter of July 9, 2010
(copy
also attached) concerning containment failure of the NFSS Interim
Waste
Containment Structure.

Thank you.

Ann Roberts.
