Subject: Re: announcements followed by several requests

Hi [REDACTED]:

Thanks so much for following up on this. We would really appreciate USACE staff participation in the visit as you see fit.

Her talk at UB will be more basic chemistry (attached is the abstract), and if you would like to come, let me know so I can get parking passes to you.

12:30 on Tuesday the 10th.

Also, if you would like to have time with her to talk in follow up or separately on that day, let me know, as I am making her itinerary for Tuesday.

Thanks
[REDACTED]

[REDACTED],

Thank you for receiving my call this afternoon.

Here are the items we discussed and the needs for our interaction:

1. August 9th (Monday), a four-member citizens panel [REDACTED] will tour the NFSS, focusing on the IWCS (say 2 hour window).

a. Time of tour still TBD – [REDACTED] determining dignitary schedule for tour window.

2. August 9th, [REDACTED] invited the USACE to staff the panel presentation and discussion at NU in the evening (1900 hrs). [REDACTED] noted this public event would generate the interest in NFSS activities and may result in after-action tasks for the USACE depending on Q&A results.

a. The USACE will have an in-house discussion to check personnel availability for this panel.

3. August 10th, [REDACTED] (invited speaker) will present information at UB (1230 hrs) and the USACE is invited to hear research and results for later discussion purposes.

USACE Action:

- * Ensure site accessibility for the tour on the 9th (once time narrowed down, we can have right people there)
- * Determine if/who from USACE will sit in on the panel discussion at 1900 hrs on 9th.
- * Determine who will attend Dr. Wall's presentation at UB on the 10th.

Panel Action:

- * Determine NFSS tour window early next week.

I think this covers it and let me know if I missed something.

Sincerely,

[REDACTED]

Subject: announcements followed by several requests

"The processing of high activity radioactive materials" by [REDACTED], Washington State University Niagara University Dunleavy 128 on August 9th at 7pm, followed by a panel of you with other local members (myself, [REDACTED] and perhaps some others from the group, including, perhaps the US Army Corp).

Prior to joining Washington State University, [REDACTED] worked at the French Commissariat a l'Energie Atomique (Atomic Energy Agency), in the division for the study of nuclear waste repositories; at Florida State University, on a post-doctoral appointment; and at Sandia National Laboratories, studying the Waste Isolation Pilot Plant, the first deep geological repository for transuranic wastes.

Technical presentation

"Radionuclide Environmental Behavior: An Overview" by N A Wall 12:30 pm on August 10th in the Department of Chemistry at UB

#####

"I can meet you on Monday at my office and take you up to Niagara, or we can see if [REDACTED] can host you for some time up at Niagara on Monday and arrange to meet with [REDACTED] and perhaps tour the Niagara Falls Storage Site.

I would like to see the storage site. Probably my husband would be interested too. Do you need special information for such tour?"

+++++

1) Request a visit to NFSS for [REDACTED] on August 9, 2010. Can you arrange for an escort?

2) Would anyone from the Corps wish to join the panel whose purpose is to answer questions from the public audience on August 9?

3) [REDACTED] commented on the Ra activity vs time chart suggesting changing it from line chart to bar chart. Select colors for the bars that contrast with the border
