

News from the Corps

Sent: Fri 3/19/10 at 3:16 PM

Hello from the U.S. Army Corps of Engineers Buffalo District:

We are sending this to you on behalf of the U.S. Department of Energy.

The U.S. Department of Energy has posted the desktop evaluation of the radiological cleanup of several closed vicinity properties at the Niagara Falls Storage Site for public review and comment. The public review period will be from the date of posting until April 23, 2010.

The "Niagara Falls Storage Site Vicinity Properties, New York: Review of Radiological Conditions at Six Vicinity Properties and Two Drainage Ditches" report is available on the Office of Legacy Management webpage at

<http://www.lm.doe.gov/Niagara/Vicinity/Documents.aspx>

Stakeholder concerns about final conditions at certain Niagara Falls Storage Site Vicinity Properties (VP) prompted DOE to respond to the community with a desktop review of remediation documentation and land use of all VPs for which DOE has completed remediation activities under the Formerly Utilized Sites Remedial Action Program (FUSRAP). A more detailed data review was conducted for selected VPs (VP-Q, VP-R, VP-S, VP-T, VP-W, and VP-X) and associated drainages.

DOE will present the report and discuss the conclusions reached with the public during the U.S. Army Corps of Engineers Lake Ontario Ordinance Works

(LOOW) Site and the Niagara Falls Storage Site (NFSS) public workshop on Wednesday, March 24, 2010, from 6 to 9 p.m. in the Lewiston Senior Center, 4361 Lower River Road, Youngstown, NY 14174.

If you have any questions concerning the report or would like more information, please contact:
