

News from the Corps

Sent: Wed 8/25/2010 4:52 PM

Hello from the U. S. Army Corps of Engineers Buffalo District:

The work plans for the demolition of Building 401 at the Niagara Falls Storage Site are now available on the Web in the Scope of Work/Work Plans section of the link below:

<http://www.lrb.usace.army.mil/fusrap/nfss/index.htm#Documents>

Also available at the link above in the Environmental Investigations section are the Corps' responses to comments received on the Niagara Falls Storage Site Remedial Investigation Report. The Corps thanks those that provided input on the report. Additional field investigations were performed to be responsive to comments received.

The validated radiological and chemical data for this additional sampling has been updated to include twelve sample results omitted from the file posted on our Web site last month. A Remedial Investigation Report Addendum is scheduled for release next year detailing the results of the additional field investigations.
