Community Input Regarding Technical Facilitation

Name (Optional) : [REDACTED]

1. What are your expectations for a technical facilitator's focus (e.g. Niagara Falls Storage Site Feasibility Study) and role?

I expect the facilitator to interact and explain, to interested citizens and members of the general public, the benefits and trade-offs of the options examined in the feasibility study. To then transmit their concerns to the Corps including opinions on weakness and data gaps that would affect the selection of options.

2. What qualifications are you looking for in a technical facilitator?

A technical facilitator will have technical background, particularly experience with uranium mill tailings especially K65.

3. What are your preferred means/methods of communicating with a technical facilitator (e.g., meetings, e-mail, telephone, conference calls, etc.) and frequency?

I expect public meetings that would be coordinated with document releases on a quarterly basis.

4. What are your expected outcomes for technically-facilitated discussions?

I hope a facilitator could help channel the public anxiety and concerns toward an acceptable removal plan for the Afrimet residues with a reasonable budget and time-line.
