Community Input Regarding Technical Facilitation

Name (Optional) : [REDACTED]

1. What are your expectations for a technical facilitator's focus (e.g. Niagara Falls Storage Site Feasibility Study) and role?

Among other things, investigate carefully the possible leakage occurring. There is evidence of this.

2. What qualifications are you looking for in a technical facilitator?

Not only scientific expertise, but an advocate role in protecting public health, and in case of doubt taking the most careful approach.

3. What are your preferred means/methods of communicating with a technical facilitator (e.g., meetings, e-mail, telephone, conference calls, etc.) and frequency?

All of the above but with preference for meetings.

4. What are your expected outcomes for technically-facilitated discussions?

I hope they lead to clear and strong recommendations for public safety. I especially hope that action will be taken quickly to stop the leakage since that endangers public health daily.

Please complete and place this form in the comment box before leaving the workshop. Or, please mail your responses to the address below:
