---

Hi [REDACTED],

1. The Corps is working to validate the data in order to provide the public with sufficient review time prior to the quarterly public workshop.
2. References 1 and 3 are available on the DOE LW website; and the remainder appear to be e-mails/communications along with data. References 5, 7, and 9 were located on microfiche (Reference 9 is 500 pages). If you would like us to consider your letter as a FOIA request for us to print or convert this information for you, please send the appropriate email to [REDACTED].
3. The work plans for the demolition of Building 401 will be placed on the web.
4. Please clarify whether you are referring to the former LOOW Site when you say FUDS.

Sincerely,

[REDACTED]

[REDACTED] -

1. You did not answer question "1." - it was a Yes or No question. Please respond.
2. This response reads is akin to, "go fish." Can you give me an example of any request for information from the public which you responded to that referred the person solely to an agency website or microfiche?

Can you print the Bechtel microfiche and post it along with those references you found on the DOE website?

3. How would I know if the contractor will address my Bldg 401 concerns in sampling? Will the public see the sampling plans at least three weeks before they go out there?

4. I can't make any FUDS suggestions for the June agenda if the Corps has not apprised us what is going on - how would we know what questions to ask?

As I stated below, please provide any as of yet un-posted data, plans for sampling, past/present/future field work, and reporting. Why not provide us the same briefing on FUDS the Corps has provided the agencies during the past 12 months?

Hi [REDACTED],

Our response is below.

1. The data for the RI Addendum will be placed on the web once it is validated.

2. The report is available on our web site. Some of the references to the report were located on the DOE website or on the microfiche we received from Bechtel. You are welcome to come into the district, by appointment, to review the microfiche.

Your February 22 letter was forwarded to LTC Snead and the team. Your concerns were considered by the team and will be addressed by sampling that the contractor will perform prior to the demolition of Building 401.

As far as what is happening on FUDS - please clarify this request. What topic are you specifically asking we add to the meeting agenda?

Please let me know [REDACTED]

Thanks,

[REDACTED]

Subject: data and info for meeting

Hi [REDACTED] -

Your email requested 30 days notice for agenda suggestions for the Corps next presentation.

1. Will the RI Addendum data collected be available to us 30 days before your meeting?

2. Will the Corps release the redacted portion of the Bechtel report? Bldg 401 is on your agenda. (Will I receive a response to my Feb. 22nd letter prior to the meeting, or will I have time to review that response before the meeting?)

What is the Corps doing between now and June 23rd that we haven't been told about yet? Or info received or will be received that we don't know about yet? (so we can determine if it might be relevant to discussion in June)

What's happening on FUDs? (new data, plans for sampling, past/present/future field work, reporting?)

The agencies get a monthly update on plans and activities by phone, but the community does not get the same info.

[REDACTED]
