[REDACTED]

My deadline for this story has been extended until Jan. 11.

Thanks,
[REDACTED]

What's your deadline. We have many people on leave this time of year, but will do our best.

Is the remedial alternatives tech memo basically a list of the alternatives that will be studied in the feasibility study?

How much detail will the remedial alternatives tech memo go into?

How much more work will the FS involve?

Where will info on cost estimates be included, in the tech memo or the FS?

Are the seven alternatives listed in the fact sheet the ones that will be reviewed in the remedial alternatives memo?

Are there tech memos like this from other projects/sites that are already completed that I can look at?

What is the importance of this remedial alternatives tech memo development to the public?

Will the development of the remedial alternatives tech memo be done by staff or consultants?

What is the expected cost of the development of the remedial alternatives tech memo?

- - - - -

On a related note, I have some questions about the RAO/ARAR:

In the development of this memo, is it fair to say the process will involve the Corps setting the cleanup standards for various contaminants, as well as selecting the contaminants of concern? In other words, is the agency reviewing and establishing what will be cleaned up and to what level?

Will the development of the RAO/ARAR tech memo be done by staff or consultants?

What is the expected cost of the development of the RAO/ARAR tech memo?

If there's anything else I should know on these topics, please let me know.

Thanks, Bruce.

Hi [REDACTED]

I'd like to find out more about this process. I've read the fact sheet and was hoping I could speak with someone on Wednesday.

Thanks,

[REDACTED]
