We will be posting the validated data for the Occidental Investigation on our website. The final sampling plan will be placed on the web 30 days in advance of the field effort.

Subject: Fwd: validated data for Occidental property

[REDACTED]  
I'd like to make a second request that the validated data for the investigation on Occidental be posted on the Corps web site. The community is interested in ongoing investigations into DOD waste disposal on the property because the Occidental property is close to Lewiston Porter schools and public fishing areas. Regarding further investigation of the Occidental property, will draft sampling plans be made available to the public for comment?

Thanks,

[REDACTED]

Subj: validated data for Occidental property

[REDACTED]  
Is validated data available for the investigation on the fenced storage area on Occidental? I was interested in reviewing the analytical results. I note the school data and report has already been issued. Would it be possible to post the Occidental data on the USACE web site?

Many Thanks,
