## Letters

### Lewiston board is right

I was heartened to see the members of the Lewiston Town Board take so courageous, so wise and so responsible a position regarding the considered intention of the United States Government to use Lewiston's Lake Ontario Ordnance Works property (Niagara Falls Storage Site) as a repository for low-level nuclear waste from the northeastern sector of this country.

The unanimous agreement of the Town Board not to ignore the additionally potential destructive use and further abuse of our already ravaged land, air and water, inherent in such a desecration of the environment, indicates fearless leadership of elected officials who take seriously their public charge.

I am grateful for the heroic example set by them and pledge my full support and involvement in the ongoing struggle to preserve Niagara County as an habitable and delightful living place for this and future generations.

Paul L. Moore, Minister  
First Presbyterian Church  
Lewiston, N.Y.
