

No Nuclear Dump Anywhere in WNY

Well, the federal government is at it again. They think they know what is best for us. I think it is time to convince them that we may actually have a notion as to what's "best" for us. For a long time now, someone someplace has believed we like dumps and chemical contamination. Now they have a new treat in store for us. They have selected us to be THE federal repository for low-level nuclear wastes. What a thrill and honor for us!

I feel rage that they think one more dump site won't matter in Niagara County. I feel rage that they would even consider putting a nuclear dump adjacent to a school, which most of the children in the towns of Lewiston and Porter attend.

It is time to draw the line: No nuclear dump and no more dumps period. We definitely have more than our fair share.
