ROLE To Discuss LOOW Site

ROLE (Residents Organized for Lewiston-Porter's Environment) will hold its regular monthly meeting 7 P.M. Wednesday, Jan. 5, at the First Presbyterian Church, 505 Cayuga St.

A review of 1993's environmental events as well as a look forward to the coming year are planned. Also on the agenda will be a discussion concerning the recent announcement by the DOE (Department of Energy) to place a

permanent clay cap on radioactive waste being stored at the former LOOW site off Pletcher Road in the Town of Lewiston. Originally this was to be an interim site until a more secure repository was available.

All concerned citizens are invited to attend and are encouraged to bring holiday leftovers to share. Other refreshments will be provided.
