Officials to discuss Lewiston site cleanup

LEWISTON — Federal Energy Department officials will be on hand to discuss issues during a public "availability session" from 4 to 7 p.m. April 21 at the Niagara Falls Storage Site.

Site manager Ronald E. Kirk will field questions on the site, once a part of the Army's Lake Ontario Ordnance Works. The site has been cleaned up under the Energy Department's Formerly Utilized Sites Remedial Action Program, and contaminated materials now are stored in a waste containment structure at the 1397 Pletcher Road facility.
