Programs & Project Management

SUBJECT: Draft Proposed Plan, Draft Feasibility Study Addendum, and Technical Memorandums for the Seaway FUSRAP Site

[redacted]  
Erie County Department of  
Environment & Planning  
95 Franklin Street  
Buffalo, New York 14202

Dear [redacted]

Attached for your review and comments are a number of Seaway documents, which when finalized, will be released to the public for formal comment. Although some of these documents are working drafts, they provide adequate specificity to allow your agency to provide comments on the plans being considered for our July 10 meeting. The meeting is crucial to insure our agencies discuss our concerns and differences before going public with any plan. Our senior staff will attend this meeting to discuss and assure your comments are properly addressed.

We need to work with you and want to move forward in a spirit of partnership. These documents provide us that means. The review will provide you maximum exposure to our process and input to our findings. It is important that when we meet, you will have examined the documents in detail, and be prepared and willing to share your agency's concerns. This will ensure that we can give full consideration to your comments prior to official release of these documents to the public.

I am having these documents provided by e-mail to allow you maximum review time. If this doesn't meet your needs, please notify me directly, and I will provide hard copies.

Sincerely,

  
Chief, Programs & Project  
Management Division

Attachments (sent separately to facilitate transmission)  
Risk Assessment Technical Memo  
Radon Gas Technical Memo  
Draft Feasibility Study Addendum (3 parts)  
Draft Proposed Plan
