Re: Seaway FUSRAP Site Proposed Plan Comment Period

Dear [REDACTED]:

On August 28, 2008, the US Army Corps of Engineers issued an Addendum to the Feasibility Study and Proposed Plan for the Seaway FUSRAP Site. The Proposed Plan identified the USACE preferred alternative for remediation of radioactive MED waste materials found on site. The preferred alternative selected by the USACE involves containment of the majority of waste materials on site through capping with minimal excavation. The formal comment period for the Plan was extended to October 27, 2008.

The County of Erie hereby requests that the formal comment period be extended to November 28, 2008. We thank you in advance for your cooperation on this matter.

Deputy Commissioner
Department of Environment and Planning
