SUBJECT: Formerly Utilized Sites Remedial Action Program, Sampling of the Tonawanda Landfill and Mudflats

[REDACTED]

[REDACTED]:

I am writing to inform you that sampling for Formerly Utilized Sites Remedial Action Program (FUSRAP) related materials in the Town of Tonawanda Landfill and the Mudflats Area will begin June 11th and will last for approximately four to five weeks.

The sampling will include a gamma walkover survey, soil sampling, and groundwater sampling. We have enclosed a fact sheet to show you the types of equipment that will be used for the sampling. Workers will be wearing protective clothing as a precaution since they will be sampling in the landfill. There will be no soil exposed or dust created during the sampling. All activities will be conducted in a manner which ensures protection of human health and the environment.

To keep you informed of the sampling results, we will be holding an information session in the fall when the report of the results is complete. This sampling effort will allow us to gather sufficient information to support an informed decision regarding a remedy for the site.

If you have any questions please contact our Public Affairs Office at (800) 833-6390 or (716) 879-4156, or email us at fusrap@usace.army.mil. You can also visit our website at www.lrb.usace.army.mil/fusrap for further information.

SUBJECT: Formerly Utilized Sites Remedial Action Program, Sampling of the Tonawanda Landfill and Mudflats

[REDACTED]

[REDACTED]

I am writing to inform you that sampling for Formerly Utilized Sites Remedial Action Program (FUSRAP) related materials in the Town of Tonawanda Landfill and the Mudflats Area will begin June 11th and will last for approximately four to five weeks.

The sampling will include a gamma walkover survey, soil sampling, and groundwater sampling. We have enclosed a fact sheet to show you the types of equipment that will be used for the sampling. Workers will be wearing protective clothing as a precaution since they will be sampling in the landfill. There will be no soil exposed or dust created during the sampling. All activities will be conducted in a manner which ensures protection of human health and the environment.

To keep you informed of the sampling results, we will be holding an information session in the fall when the report of the results is complete. This sampling effort will allow us to gather sufficient information to support an informed decision regarding a remedy for the site.

If you have any questions please contact our Public Affairs Office at (800) 833-6390 or (716) 879-4156, or email us at fusrap@usace.army.mil. You can also visit our website at www.lrb.usace.army.mil/fusrap for further information.

Sincerely,

I am writing to inform you that sampling for Formerly Utilized Sites Remedial Action Program (FUSRAP) related materials in the Town of Tonawanda Landfill and the Mudflats Area began June 11th and will last for approximately four to five weeks.

The sampling will include a gamma walkover survey, soil sampling, and groundwater sampling. We have enclosed a fact sheet to show you the types of equipment that will be used for the sampling. Workers will be wearing protective clothing as a precaution since they will be sampling in the landfill. There will be no soil exposed or dust created during the sampling. All activities will be conducted in a manner which ensures protection of human health and the environment.

To keep you informed of the sampling results, we will be holding an information session in the fall when the report of the results is complete. This sampling effort will allow us to gather sufficient information to support an informed decision regarding a remedy for the site.

If you have any questions please contact our Public Affairs Office at (800) 833-6390 or (716) 879-4156, or email us at: fusrap@usace.army.mil. You can also visit our website at www.lrb.usace.army.mil/fusrap for further information.

Sincerely,
