SUBJECT: Updated Baseline Risk Assessment for the Landfill Operable Unit of the Tonawanda Landfill Vicinity Property

Honorable Louise M. Slaughter  
Representative in Congress  
2469 Rayburn HOB  
Washington, DC 20515

Dear Representative Slaughter:

The U.S. Army Corps of Engineers is releasing the updated Baseline Risk Assessment for the Landfill Operable Unit of the Tonawanda Landfill Vicinity Property to the Linde Formerly Utilized Sites Remedial Action Program (FUSRAP) Site, located in the Town of Tonawanda, New York.

The Corps is the lead Federal agency for this project, executing FUSRAP in accordance with the governing Federal law – the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the National Oil and Hazardous Substances Pollution Contingency Plan (NCP).

In 2009 through 2011 the Corps conducted additional soil, groundwater, sediment and surface water sampling on the Landfill Operable Unit of the vicinity property. The purpose of the sampling was to confirm the levels and extent of uranium, radium and thorium in the Landfill Operable Unit. Data from this sampling was used to update the Baseline Risk Assessment to ensure that it accurately reflects the potential for human exposure to FUSRAP-related material in the Landfill Operable Unit, given the Landfill's proximity to residential property.

The updated Baseline Risk Assessment concludes the following:

1. That for the current use of the Landfill Operable Unit, as it is currently configured, risks to human health from potential exposures to FUSRAP-related material are within the acceptable limits established in the NCP.
2. If the surface of the landfill is not maintained and is allowed to erode over time, exposing FUSRAP-related material that is currently buried, then risks to trespassers or other users on the site could increase above the NCP acceptable risk range within the 1,000-year evaluation period.

OFFICE: Executive Office

SUBJECT: Updated Baseline Risk Assessment for the Landfill Operable Unit of the Tonawanda Landfill Vicinity Property

Based on the analysis provided in the updated Baseline Risk Assessment the Corps' next step will be to prepare a Feasibility Study for the Landfill Operable Unit. The Feasibility Study will develop remedial alternatives which would be appropriate to mitigate potential future unacceptable risks from exposure to the buried FUSRAP-related material in the Landfill Operable Unit.

The updated Baseline Risk Assessment has been placed in the Administrative Record File for the Tonawanda Landfill Vicinity Property, which is available for review in the Tonawanda Public Library, 333 Main Street, Tonawanda, NY 14150. The Administrative Record File is also available for review by appointment at the Buffalo District Office Library located at 1776 Niagara Street in Buffalo, New York. The Baseline Risk Assessment is also available on the Corps' Tonawanda Landfill website at [www.lrb.usace.army.mil/fusrap/landfill](http://www.lrb.usace.army.mil/fusrap/landfill).

The Corps is holding an Availability Session on Tuesday, July 17, 2012, between 2:30 and 4:30 p.m. and between 6 and 8 p.m., at VFW Post 7545, 110 Elgin Street, Tonawanda, NY 14150. Members of the project delivery team will be available to talk with members of the community regarding the updated Baseline Risk Assessment.

A copy of this letter with the report is being provided to your Buffalo and Rochester offices, and to the enclosed distribution list.

If you have any questions please contact Mr. Stephen Buechi, Senior Project Manager, by telephone at 716-879-4287. Additionally, the Buffalo District provides the public a toll-free telephone number (800-833-6390), email address ([fusrap@usace.army.mil](mailto:fusrap@usace.army.mil)) and internet site ([www.lrb.usace.army.mil/fusrap](http://www.lrb.usace.army.mil/fusrap)) to provide information on FUSRAP projects.

Sincerely,

Lieutenant Colonel, Corps of Engineers  
District Commander

The Administrative Record File is also available for review by appointment at the Buffalo District Office Library located at 1776 Niagara Street in Buffalo, New York. The Baseline Risk Assessment is also available on the Corps' Tonawanda Landfill website at [www.lrb.usace.army.mil/fusrap/landfill](http://www.lrb.usace.army.mil/fusrap/landfill).

The Corps is holding an Availability Session on Tuesday, July 17, 2012, between 2:30 and 4:30 p.m. and between 6 and 8 p.m., at VFW Post 7545, 110 Elgin Street, Tonawanda, NY 14150. Members of the project delivery team will be available to talk with members of the community regarding the updated Baseline Risk Assessment.

A copy of this letter with the report is being provided to the enclosed distribution list.

If you have any questions please contact Mr. Stephen Buechi, Senior Project Manager, by telephone at 716-879-4287. Additionally, the Buffalo District provides the public a toll-free telephone number (800-833-6390), email address ([fusrap@usace.army.mil](mailto:fusrap@usace.army.mil)) and internet site ([www.lrb.usace.army.mil/fusrap](http://www.lrb.usace.army.mil/fusrap)) to provide information on FUSRAP projects.

Sincerely,

Lieutenant Colonel, Corps of Engineers  
District Commander

**JUN 29 2012**

**SUBJECT: Updated Baseline Risk Assessment for the Landfill Operable Unit of the Tonawanda Landfill Vicinity Property**

Honorable Anthony F. Caruna  
Town of Tonawanda Supervisor  
Municipal Building, Room 11  
2919 Delaware Avenue  
Kenmore, NY 14217-2395

Dear Supervisor Caruna:

The U.S. Army Corps of Engineers is enclosing a copy of the updated Baseline Risk Assessment for the Landfill Operable Unit of the Tonawanda Landfill Vicinity Property to the Linde Formerly Utilized Sites Remedial Action Program (FUSRAP) Site, located in the Town of Tonawanda, New York.

The Corps is the lead Federal agency for this project, executing FUSRAP in accordance with the governing Federal law – the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the National Oil and Hazardous Substances Pollution Contingency Plan (NCP).

In 2009 through 2011 the Corps conducted additional soil, groundwater, sediment and surface water sampling on the Landfill Operable Unit of the vicinity property. The purpose of the sampling was to confirm the levels and extent of uranium, radium and thorium in the Landfill Operable Unit. Data from this sampling was used to update the Baseline Risk Assessment to ensure that it accurately reflects the potential for human exposure to FUSRAP-related material in the Landfill Operable Unit, given the Landfill's proximity to residential property.

The updated Baseline Risk Assessment concludes the following:

1. That for the current use of the Landfill Operable Unit, as it is currently configured, risks to human health from potential exposures to FUSRAP-related material are within the acceptable limits established in the NCP.
2. If the surface of the landfill is not maintained and is allowed to erode over time, exposing FUSRAP-related material that is currently buried, then risks to trespassers or other users on the site could increase above the NCP acceptable risk range within the 1,000-year evaluation period.

OFFICE: Executive Office

SUBJECT: Updated Baseline Risk Assessment for the Landfill Operable Unit of the Tonawanda Landfill Vicinity Property

Based on the analysis provided in the updated Baseline Risk Assessment the Corps' next step will be to prepare a Feasibility Study for the Landfill Operable Unit. The Feasibility Study will develop remedial alternatives which would be appropriate to mitigate potential future unacceptable risks from exposure to the buried FUSRAP-related material in the Landfill Operable Unit.

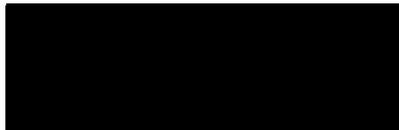

The updated Baseline Risk Assessment has been placed in the Administrative Record File for the Tonawanda Landfill Vicinity Property, which is available for review in the Tonawanda Public Library, 333 Main Street, Tonawanda, NY 14150. The Administrative Record File is also available for review by appointment at the Buffalo District Office Library located at 1776 Niagara Street in Buffalo, New York. The Baseline Risk Assessment is also available on the Corps' Tonawanda Landfill website at [www.lrb.usace.army.mil/fusrap/landfill](http://www.lrb.usace.army.mil/fusrap/landfill).

The Corps is holding an Availability Session on Tuesday, July 17, 2012, between 2:30 and 4:30 p.m. and between 6 and 8 p.m., at VFW Post 7545, 110 Elgin Street, Tonawanda, NY 14150. Members of the project delivery team will be available to talk with members of the community regarding the updated Baseline Risk Assessment.

A copy of this letter with the report is being provided to Mr. Michael Kaiser, Director, and Mr. Robert Morris, both of the Technical Support Department, Town of Tonawanda, and to the enclosed distribution list.

If you have any questions please contact Mr. Stephen Buechi, Senior Project Manager, by telephone at 716-879-4287. Additionally, the Buffalo District provides the public a toll-free telephone number (800-833-6390), email address ([fusrap@usace.army.mil](mailto:fusrap@usace.army.mil)) and internet site ([www.lrb.usace.army.mil/fusrap](http://www.lrb.usace.army.mil/fusrap)) to provide information on FUSRAP projects.

Sincerely,
