David Romano

Deputy District Engineer for Program & Project Management

I am excited to share with you that we have launched our [IIS Web page](#)! There you will find information about our current partnerships, projects, capabilities, and how you can become involved with our IIS program. The Web page is just the beginning. We have a host of services that we offer our partners, and are always looking for new ways we can customize our IIS program to continually best deliver innovative solutions.

The U.S. Army Corps of Engineers (USACE), Buffalo District Interagency and International Services (IIS) program provides an avenue for our partners both within and outside the Federal family to connect with and utilize our extremely skilled workforce of engineers, scientist, and technical experts. Now we have a new and exciting way for our current and future customers to learn what unique services the IIS program can offer. The Buffalo District [IIS Web page](#) is a showcase of our ever-evolving and enhancing abilities in solving complex issues. Our services include but are not limited to facilities work, environmental efforts, our regional Dive Team, and our new and expanding GIS based team. Buffalo District is putting our skills on display!

Customs & Border Protection Station

The IIS program's highly skilled workforce provides significant value to the Nation to include adding value to the economy, and more importantly contributing to its security. The IIS mission provides a key foundational component of the Nation's security through works completed for the U.S. Customs and Border Protection (CBP) Agency.

What the CBP is saying about Buffalo District IIS program: "This idea of jointness has morphed from a best practice to a necessity. In a time of fiscal constraint and austerity, this is the way to go."

~Randy Gallegos, Chief of Border Patrol Detroit Sector
