Condition of Federal Navigation Channel Niagara River, Niagara Falls, New York

1. Condition surveys performed within the Federal Navigation Channel at Niagara River, New York during the months of October and November 2015 indicate shoaling has reduced depths to those shown on the attached standard tabular form and channel condition drawings.
2. Soundings are in feet and referred to Low Water Datum (LWD) above Mean Water Level (MWL) at Rimouski, Quebec (International Great Lakes Datum 1985). LWD elevations for this area are based on decreasing graduated planes as shown on sheets 3 and 4 of this document.
3. Vessel operators are advised to use caution when navigating in this area.
4. Copies of the sounding print for Niagara River, New York consisting of (7) sheets, Niag15VH101to7-7, at a cost of \$2.50 per sheet will be furnished upon receipt of a check in the full amount made payable to: USACE Finance and Accounting. Requests should be addressed to: District Commander, U.S. Army Engineer District, Buffalo, ATTN: NY/PA O&M Office, 1776 Niagara Street, Buffalo, New York 14207, requesting exact number or copies of sheets by file number. A point of contact and phone number must be indicated to facilitate response to the request. To download the same information and other related materials at no cost, simply point your web browser to <http://www.lrb.usace.army.mil/Library/MapsandCharts.aspx> then locate the harbor on the table of harbors and click on the file icon to see or download the file.
5. Buffalo District's point of contact in reference to the exact number of sheets, file number, and the availability of any later information pertaining to the area is Mr. Roman H. Figler III, PLS, Chief, Survey Section, Buffalo District, who may be contacted by phone at 716-879-4429.

Mr. ROMAN H. FIGLER III, PLS
Chief, Survey Section
