

Project Condition Surveys – Unfunded Harbors New York, Ohio & Pennsylvania

Project Features

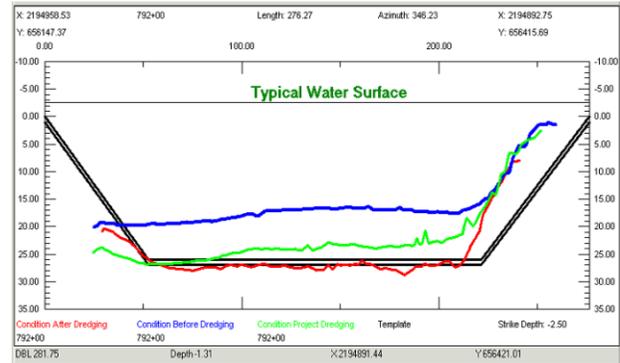

- Perform hydrographic and topographic surveys of 35 commercial and recreational harbors on Lakes Erie and Ontario in the states of New York, Ohio and Pennsylvania
- Authorization: River & Harbor Acts of 1875, 1886, 1888, 1896, 1899, 1902, 1907, 1910, 1916, 1917, 1935, 1937, 1945, 1946, 1958, 1960, 1962, Water Resources Development Acts of 1976 and 1986, Supplemental Appropriations Act of 1987 and the Energy & Water Appropriations Act of 1988
- Surveys provide data that is used to compare authorized depth of Federal navigation channels and the design of navigation infrastructure, such as locks, breakwater, piers and jetties, to actual current conditions
- Surveys are also used to communicate the condition of Federal channels to navigation interests and determine maintenance requirements

Project Requirements

- Ability to survey navigation projects as scheduled or as needed to assess the impacts of natural and/or man-made events

Consequences of Not Surveying Projects

- Failure to survey navigation projects would result in unknown channel and structure conditions. This could create a significant safety hazard to commercial and recreational interests; as well as waterfront development protected by navigation structures
- Inadequate survey data will negatively impact the ability to effectively manage risk and navigation assets

Project Importance

- Survey data are used internally for short and long term planning/scheduling purposes and support the District's obligation to maintain our authorized Federal Channels
- Survey data are made available to the general public on the Web and are used as unofficial navigational charts for both recreational and commercial vessels
