***Note: If the area of proposed work activity on the parcel is less than the total area/acreage of the parcel, distinguish this on the survey map and stake the area out on the site. This will facilitate the Corps field visit by focusing our investigation of the site.

Additionally, if you have any of the following information, please include it with your request: past wetland delineation, relevant maps, drain tile survey, topographic survey, site photographs.

If you are considering doing work on the property, please identify on the site map, survey, or a separate drawing: the footprint, location, and type of potential work. It will assist us in the determination process and reduce unnecessary delays of processing subsequent permits, if required.

PLEASE NOTE: Given heavy workloads, especially during the Spring and Summer months, it may take several months before the Corps is able to inspect your property. Property owners always have the option of securing the services of a consultant to delineate wetlands or waterways and then submit the report for verification by the Corps.
