Attention: Mr. Leland Fuerst
Project Manager

Gentlemen: Lake Ontario Ordnance Works, Lewiston, NY
Safety, Health and Emergency Response Plan

Enclosed you will find a copy of a letter from Acres safety subcontractor, Terrence Shannon of Synergist. After consultation with Mr. Shannon, Acres will have Mr. George Moretti, who has recently joined our staff, assume the role of Onsite Safety Coordinator during certain non-intrusive tasks in which the potential for personnel to be exposed to significant contamination is minimal. Mr. Moretti will give subcontractors an initial site safety briefing to review and implement the SHERP and shall be responsible for ensuring that the subcontractor performs the work within the guidelines of the SHERP. He may in turn, during his absence from the site, assign qualified Acres or subcontractor personnel as Onsite Safety Designees who will be responsible for implementing relevant portions of the SHERP.

Mr. Moretti's qualifications include 10 years of experience in hazardous waste site investigations and health and safety responsibilities for the past 5 years. He has developed and implemented site-specific safety plans for five remedial investigations for the New York State Department of Environmental Conservation (NYSDEC) and one design investigation, Helen Kramer Landfill, for the Corps of Engineers. We feel confident that Mr. Moretti is fully qualified to assume the role of Onsite Safety Coordinator.

Synergist will remain the primary safety consultant and will be onsite during all intrusive tasks including test pits and the drilling and installation of monitoring wells.

If you have any questions or comments regarding this matter, please feel free to contact me.

Very truly yours,

Lawrence D. Zamojski
Project Engineer
