subject: Vandalism at the Former Lake Ontario Ordnance Works

There was a significant occurrence of vandalism at our asbestos abatement project at the former Lake Ontario Ordnance Works over the week end. The State Police were called.

Apparently, someone or some group entered the site, started the heavy equipment, totally destroyed our construction trailer, and caused significant damage to other trailers and the heavy equipment.

This will cause a schedule disruption of a couple of days. Our contractor will mobilize additional equipment and start work again tomorrow.

There is a possibility of future serious incidents in that our contractor has been informed there will be union picketing of the site by some local unions.

Our contractor will have to provide additional security at this fenced in former Defense Site. I will keep you posted if significant concerns arise.

I have attached a few photos of the damage for your observation.
