Special Studies – State of Ohio

Section 206 of the 1960 Flood Control Act, as amended
General Investigations

Location

- Streams and rivers of OH, located within the Buffalo District boundaries.

Project Description

- A Special Study will create a hydrologic and hydraulic model for portions of identified creeks and streams.
- The study will determine the 1% and .2% chance of exceedence (100 and 500-year flood plain) in the area.

Importance

- Updated flood plain information will assist local officials in zoning and flood plain management in the community.

Consequences

- Without updated studies, communities will not have accurate and current flood plain information.
