Authorization for Remedial Action of the Ashland 2 Site, Tonawanda, New York

Joe LaGrone, Manager
Oak Ridge Operations Office

Based on the Aerial Radiological Survey (Attachment 1) and a "walk-on" radiological survey (Attachment 2, excerpted from the ORNL draft report "Ground-Level Investigation of Anomalous Gamma Radiation Levels in the Tonawanda, New York, Area," January 1980), the property identified as Ashland 2 is authorized for remedial action. It should be noted that the attached survey data are for designation purposes only and Bechtel National, Inc. (BNI), should conduct appropriate comprehensive characterization surveys to determine the extent and magnitude of the radiological contamination on this property. It is suggested that BNI discuss the ORNL survey results with ORNL to get a better understanding of the work they did on the Ashland 2 site. Attachment 2, the ORNL draft survey data, is for authorization purposes only and should not be disseminated except to BNI for their planning work.

If there are any questions, please call Arthur Whitman on FTS 233-5439.

/S/

William R. Voigt, Jr.
Acting Director
Office of Terminal Waste Disposal
and Remedial Action
Office of Nuclear Energy
