SUBJECT: FUSRAP - Former Guterl Specialty Steel Site, Lockport, New York

Ms. Barbara Youngberg
Bureau of Radiation, Division of Solid & Hazardous Materials
New York State Department of Environmental Conservation
625 Broadway - 7255
Albany, NY 12233-7255

Dear Ms. Youngberg:

I am pleased to provide you the last of the project work plans that have been prepared to support our remedial investigation of radiological contamination at the former Guterl Specialty Steel Site located in Lockport, New York:

Enclosed are the Sampling and Analysis Plans.

- a. Volume 1 identifies the Field Sampling Plan
- b. Volume 2 identifies the Quality Assurance Plan

Our next step in the process requires us to negotiate and award Task 6 of the contract which is the field sampling and analysis work. We will attempt to complete the effort to allow us to mobilize to the site by early summer 2007. I will keep you informed of any significant developments as they occur.

If you have any questions or require any additional information, please do not hesitate to call me at (716) 879-4146 or by writing to the above address.

Sincerely,

Raymond L. Pilon
Project Manager
