In brief

Data sought from Simonds employees

The Buffalo district of the United States Army Corps of Engineers is researching the former Guterl Specialty Steel Corp./Simonds Saw and Steel Co. for potential inclusion in the Formerly Utilized Sites Remedial Action Program.

The district is seeking information from employees who worked at the site, according to the office of state Sen. George Maziarz.

The remedial action program is an initiative to identify, investigate and clean up or control sites that were part of the nation's early atomic energy program.

Former Guterl and Simonds employees are asked to call 800-833-6390 to speak with a public affairs representative.
