

Formerly Utilized Sites Remedial Action Program Army Corps of Engineers Buffalo District

Guterl Steel FUSRAP Site

Background

The former Simonds Saw and Steel Company performed rolling mill operations on uranium and thorium metal from 1948 to 1956 under contract with the Atomic Energy Commission (AEC), to support the Nation's early atomic energy program. Simonds Saw and Steel was sold to Wallace and Murray, and then sold to Guterl Specialty Steel Corporation. In March 1984 Allegheny International (now Allegheny Ludlum Corporation) purchased the entire site with the exception of those areas that had been used during the AEC activities.
