Subject: RE: LOOW Water analysis

Becky,
Thanks for the quick response. Dave, Fred and I will regroup and discuss our options based on the analytical results. We'll get back to you very soon.
Debbie

Debbie -

Unfortunately, the TCE result of 36.5 ug/l exceeds our SPDES limit of 10 ug/l, so we are not able to approve the discharge. I would suggest that you discuss further options/mechanisms with DEC.

I am in the office today if you need to reach me.

Becky

Subject: FW: LOOW Water analysis

Becky and Jill,

Attached is the CWM required sample results from the baker tank. Jeff Shirley will distribute the lab QA/QC results as soon as he receives them. He will call the lab today. Please review the results and let me know if you have any questions or comments.

Once we receive your letter of authorization, DEC will allow us to pump to outfall #2.

Hopefully we can be onsite in a couple of weeks to finish the removal of the CMSA Pad.

Thanks,

Debbie

Harold,

Attached is the requested additional analysis for the water at the LOOW Site. Please distribute as you see fit. CWM will need a copy. Please call or e-mail with any questions.

Thanks

Jeffrey L. Shirley
