**Subject:** REMOVAL OF CMSA PAD

Good morning,

I just talked to Becky to inform her of our plan of action for the removal of the CMSA Pad. Becky said she will contact Laurie Sullivan for the stone disposal and Tom Fogarty for the water disposal to let them know SES will be contacting them soon.

CWM still wants the stone, so they will supply the trucks and disposal for free. For water disposal at CWM, we pick up all costs.

John Mitchell will advise today if we need to take any more Rad samples during the water disposal operations. All other required testing is in place.

Once SES talks to CWM, they will send us a schedule of the remaining work.

I will be TDY until Friday, so if there are any questions, I'll get back to you then.

Thanks,  
Debbie
