Subject: CMSA Pad Baker Tank Water Disposal

Becky,

Attached is the explosive data for the baker tank full of water. Dave previously sent you the chem. and Rad analysis in the e-mail below. Could you please let us now what your criteria is for explosives so we can determine the proper disposal method?

Thanks,
Debbie

Subject: FW: LOOW CMSA Pad Data

Becky,

Attached are data and a few e-mails being shared with the DEC's Radiation Section, regarding the disposal of the CMSA pad. They committed to review the data and make a determination on disposal of the stone and collected water in the next few days, which will dictate when we can actually begin disposal and backfill. Let us know of any questions.

Happy New Year,

Dave
