Subject: Re: Lake Ontario Ordnance Works - Phase I IRA

Dear Mr. Pilon,
I have received the "Delivery Order 1 Draft Submittals" dated July 1, 1998.

Was there a cover letter? I will be reviewing and will send out a letter on this package and the 100% Design package next week.

Has the NYS Department of Labor issued a permit for the Asbestos abatement?

Since the USACE has (reportedly) received funding for phase 2 the schedule for the phase 1 IRA could be adjusted so that items from both phases (clearing & grubbing, reseeding) could be performed concurrently.

After Phase 1 & 2 are completed, the Department will be requiring that some sort of confirmation sampling be performed and a radiological survey of the Somerset Group property to confirm decontamination to the release level of 20 uR/hr. (Previous Federal Government surveys did not achieve this level and have resulted in deed restrictions on the property by the NYSDOH).

I will be in touch to follow up on these issues.

Sincerely, Kent Johnson
