Subject: Re: CMSA Pad Fact Sheet

Dave,

I have reviewed the draft CMSA "fact sheet" and would like to offer the following observations:

First section:

Third bullet:

The CMSA was constructed 1999 by Radian as part of the TNT waste pipeline removal action.

Fourth bullet:

Radiation sampling is limited to health and safety and disposal characterization under DERP-FUDS.

Second Section:

Retitle: Where is the CMSA located?

or describe that elevated readings were noted from discrete locations beneath the former CMSA

Fourth section

First Bullet: Due to NYS Department of Health restrictions, disturbed soils were scanned for potential radiological contamination. This radiological characterization plan was approved by the NYSDOH.

Fifth Section

Second Bullet: The NYSDEC is the regulatory authority for all environmental restoration work in NYS, not just a stakeholder.

Sixth Section

Fourth and Fifth Bullet: Please note that any and all disposal will be at a facility approved and permitted to receive such materials.
