

## Construction equipment vandalized at N-waste site

PORTER — Two trailers and a temporary building were wrecked and four pieces of construction equipment damaged in a massive case of vandalism at the former Lake Ontario Ordnance Works site on Balmer Road, Trooper Eldred Green said Sunday.

Green said an excavator and three forklifts were damaged, and they were also used to ruin the trailer and a decontamination building.

The wreckage was discovered shortly after 9 a.m. Sunday. There was no damage estimate on the property, which belongs to Environmental Products and Services Inc. of the Town of Tonawanda. Green said that company is involved in removing asbestos from buildings at the site, where nuclear waste from the World War II atomic bomb project has long been stored.

Green said the excavator was driven through an office trailer, and one of the forklifts plowed through a trailer unit from a tractor-trailer that was parked on the site.

The temporary decontamination building, where workers clean up after handling the asbestos, was also struck by one of the construction machines.

Green said all the windows of the four construction vehicles were smashed, doors damaged, and hydraulic lines removed.

## Vandals wreck trailers, buildings

PORTER — Two trailers and a temporary building were wrecked and four pieces of construction equipment damaged in a massive case of vandalism at the former Lake Ontario Ordnance Works site on Balmer Road, Trooper Eldred Green reported Sunday.

Green said an excavator and three forklifts were damaged and were also used to ruin the trailer and a decontamination building.

The wreckage was discovered shortly after 9 a.m. Sunday. There was no damage estimate on the property, which belongs to Environmental Products and Services of the Town of Tonawanda. Green said that company is involved in removing asbestos from buildings at the site, where nuclear waste from the World War II atomic bomb project has long been stored.

Green said the excavator was driven through an office trailer, and one of the forklifts plowed through a trailer unit from a tractor-trailer that was parked on the site.

The temporary decontamination building, where workers clean up after handling the asbestos, was also struck by one of the construction machines.

Green said all the windows of the four construction vehicles were smashed, doors damaged, and hydraulic lines removed. It all happened sometime after 4 p.m. Saturday, Green said after interviewing construction supervisor John S. Scott.

The site is surrounded by chain-link fences, which Green said appeared to be undamaged.
