

Town of Lewiston Environmental Commission

August 13, 2008

Mr. William Kowalewski, P.E. P.M.P
Lake Ontario Ordinance Works Project Manager
Buffalo District, Corps of Engineers
Department of the Army
1776 Niagara Street
Buffalo, New York 14207-3199

Dear Mr. Kowalewski:

I am writing to you on behalf of the Town of Lewiston Environmental Commission regarding "Project Update on the Former Lake Ontario Ordinance Works Wastewater Treatment Plant" memo which was discussed at our meeting of August 12, 2008.

At that meeting, it was decided unanimously that the Environmental Commission would like to review the plans, designs and specifications that you have made regarding removal of wastewater tanks and monitoring procedures for the LOOW site. Since you have already put that project out for public bid, it is imperative that these plans be reviewed as soon as possible by the Environmental Commission.

The Environmental Commission supports the clean up and monitoring of the LOOW site and recognizing its own responsibility to review these kinds of efforts, is committed to working with the Corps as we have done in the past. You may recall that the Environmental Commission worked cooperatively with the Corp a few years ago to collect and properly destroy T N T which was found at the site. This past summer, members of the Environmental Commission took an informational field trip to the LOOW site which was conducted by Corps and contractual staff.

To expedite your plans, I am prepared to call an emergency meeting of the Environmental Commission to review your plans and meet with your representatives, if you so desire.

Sincerely,

James M. Allen
