# Luckey Site Cleanup

Formerly Utilized Sites Remedial Action Program • Luckey, Ohio

**2021 Data through**

**30**  
**APRIL**

The U.S. Army Corps of Engineers Buffalo District is currently removing the production building and some smaller buildings from the Luckey Formerly Utilized Sites Remedial Action Program (FUSRAP) Site in Luckey, Ohio. During the building removal, all wastewater will be transported off-site for treatment. Contaminated soils underneath the buildings will then be excavated and the clean up will continue through the other areas of the site. The Corps of Engineers' highest priority during cleanup activities at the site is to be protective of human health and the environment, ensure that work is conducted in a safe and efficient manner, and prevent the spread of contamination. The information below summarizes the progress made at the site as of the date above. These infographics are posted to the Luckey Site website on a weekly basis.
