2020 Data through

7

AUGUST

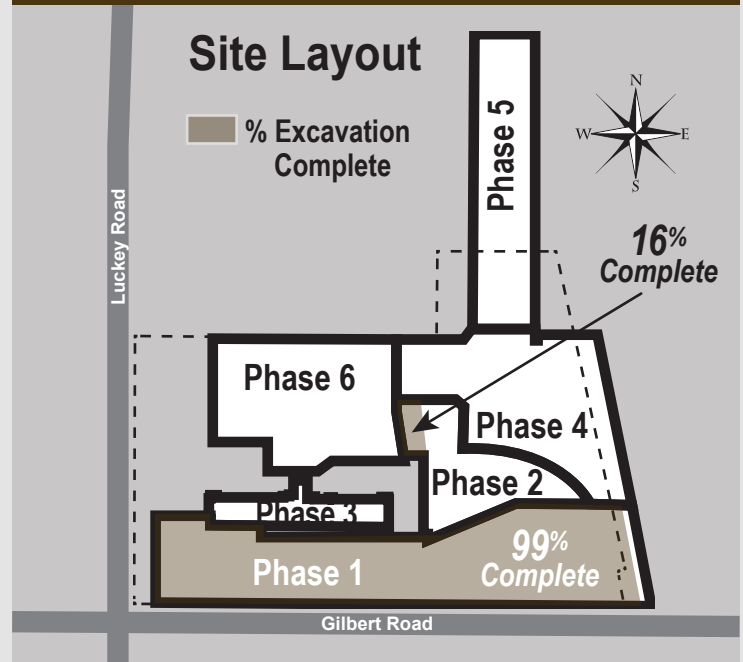

The U.S. Army Corps of Engineers Buffalo District is excavating soils contaminated with beryllium, radium-226, thorium-230, uranium-234, uranium-238, and lead from the Luckey, Ohio, site under the Formerly Utilized Sites Remedial Action Program (FUSRAP). The Corps of Engineers' highest priority during cleanup activities at the site is to be protective of human health and the environment, ensure that work is conducted in a safe and efficient manner, and prevent the spread of contamination. The information below summarizes the progress made at the site as of the date above. These infographics are posted to the Luckey Site website on a weekly basis.
